### THIN PLYWOOD

New at Hyatt's, this is a popular wood for all types of woodworking projects. Midwest's thin plywood sheets take paint and varnish well and produce an outstanding finished piece.

| X77500 | PLYWOOD .4MM (1/64) X 6 X 12IN  |
|--------|---------------------------------|
| X77501 | PLYWOOD .4MM (1/64) X 12 X 24IN |
| X77510 | PLYWOOD .8MM (1/32) X 6 X 12IN  |

#### **BASSWOOD**

Its close, tight homogenous grain structure makes it ideal for a wide variety of models & projects. A favorite for carving. Thin basswood may be cut with a hobby knife; thicker basswood requires a saw for cutting. Basswood may be stained or painted to represent any wood type.

| X77000 | BASSWOOD 24 X 1/16 X 1/16 |

#### **SUPER SHEETS**

These small sheets 7.6 by 12.6 inches are great for architectural modeling, mixed media and many other projects. Wide array of thicknesses, finishes, colors and textures. Clear and tinted for windows, metallic gold and silver for mirrored or metallic effects. White for smooth walls and structures. Lexan for indestructible clear panels.

#### CHIPBOARD & MAT BOARDS

Chipboards have been used for decades for making perfect architectural models. Traditional brown chipboard can vary widely due to their recycled nature. We highly recommend buying enough for your complete project to ensure consistent color. Newer white and beige pulp boards are solid all the way through and are a lower cost alternative to solid core mat boards. Museum boards are the best quality available.
