

# PANTONE® Plastics Opaque Selector PBQ100

## Overview

An entry point for Pantone Plastics, this system offers a selection of 1,005 opaque chips. Perfect for inspiration, the colors in the system are separate from the Pantone system and not recommended for color communication or production. Product managers and designers can use this set for color visualization.

## Format

- Three book collection with 30 chips per page
- Each chip measures 1.1" x 1.3" inches, smaller than for spectrophotometer readings
- Three tiers of thickness, 1mm through 3mm, allows for accurate color visualization
- Opaque chips are glossy on the front and matte on the reverse

## Color

- 1,005 opaque chips arranged in chromatic format
- Index at the front of the guide provides the numeric location for each color
- Colors are not a Pantone Standard, so pigment formulation is not included
- Individual chips and pages are available for purchase when replacements are required

## Application

*Industry: opaque hard goods, consumer packaged goods, glassware, cosmetics, and more*

*Use Case: palette development and visual inspiration, not for color communication or production*
