

Tria 12 Sets

New and Improved Range

The all-new Tria 12 Sets provide colour selections that have been expertly chosen for specific design disciplines. Students and professionals in key fields of commercial design can now pick up an optimum base set of 12 colours easily and cost-effectively.

Stylish New Packaging

The sets are supplied in a stylish and hard wearing Tria collector's tin. Finished in matt black with an embossed Tria logo, this is a great way for customers to store and transport their prized marker collections.

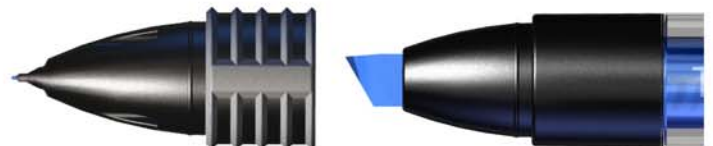

Added Blender

A Tria Blender is included with every set, in addition to the the 12 colours. The Blender is an invaluable tool when marker rendering, it's ideal for softening tones and creating smooth, blended colour transitions.

Unique Ultra-fine Nib

Tria 12 Set markers retain Tria's signature 3 nib design but feature an Ultra-fine tip in place of the usual medium point. The Ultra-fine is a unique feature not found on any other marker - it provides smooth, consistent ink flow, allowing artists to apply Tria colour in pinpoint detail. The Ultra-fine also shows off Tria's unique modularity aspect and can be easily interchanged with an alternative nib if desired.
