

Introducing
PANTONE®VIEW Colour Planner
Summer 2013

Unity & Co.

Our statement for Spring/Summer 2013?
Colour needs company...colour & CO!

As we rediscover power in numbers and embrace this new culture of unity, the marriage between colour and context grows stronger. **Bold colour continues** and further expands into new end uses. But how should it interact with product form or silhouette? What finish or fabric should be used? And in what color combinations?

Containing seasonal inspiration, key color themes and harmonies plus comprehensive color family and material direction for womenswear, menswear, activewear, cosmetics, interiors, industry and graphic design, PANTONEVIEW Colour Planner Spring/Summer 2013 has the answers you need.

Swatches of each of the forecasted colors, a wall poster that highlights the forecasted palettes, and a bonus CD with imagery from Unity & CO, convenient for downloading into presentations and storyboards.
