GERBER OMEGA™ 5.0 INSTALLATION & TECHNICAL HIGHLIGHTS

- If you choose, have OMEGA 5.0 automatically check Gerber's website for downloadable software updates.
- EDGE FX owners will automatically get the latest EDGE firefile updates, including newly released foil colors or Edge-Ready Materials.
- EDGE owners will enjoy automatic print/cut alignment with the Gerber envision 375 plotter. No more bombsight!
- Your current GSP Fonts and Libraries will be automatically copied to the correct OMEGA 5.0 folder when you upgrade.
- OMEGA 5.0 can reside side-by-side with the following previous versions of OMEGA: 2.6.1, 3.0 or 4.0
- DVD-ROM drive required for installation. Compatible with Microsoft Windows® XP SP3 (32-bit), Vista® (32-bit) or Windows 7® (32-bit Recommended, or *64-bit with some exceptions.)
 - 3-D Autocurve and Braille Interpreter will not run on 64-bit.
 - If you are running a Gerber Edge or Edge 2 with a parallel port, you must run a 32-bit system.
 - Gerber offers a USB to Parallel Port option that can interface Edge and Edge 2 printers to the 64-bit Windows 7 OS. If running a 64 bit OS with an EDGE 1 or EDGE 2 you must use the GSP USB to Parallel cable.
 - The EDGE FX uses an Ethernet port and does not require additional adapters for 64-bit use.

CLICK HERE for a complete list of System Requirements.

OMEGA™ CP CUT & PRINT

Provides a comprehensive set of software tools for graphics design and production using cut vinyl plus digital imaging. OMEGA CP *MIP (Multiple Installation Program) is available to customers who already own OMEGA™ CP software, at a substantial savings.
