## RONAN PAINTS

T.J. Ronan Paint Corp. has been supplying the paint industry with quality specialty paint products since 1889. They are recognized as leaders in technology for Sign paints, Water Based Coatings, lead-free products, Clears, Japan Colors and Faux Finishes.

Ronan Paint manufacturers coatings for the graphic art, decorative paint and faux finish markets. Products include sign paint, metallics, primers, fluorescent, UV clears, japan and industrial coatings.

**AQUACOTE**

WATER-BASED BULLETIN ENAMEL

## AQUA-COTE

Aquacote is a waterborne, low odor, high gloss, solid covering, acrylic bulletin enamel formulated for graphic arts and signage applications. It is lead free, fast drying, easy brushing, environmentally friendly and has easy clean up. It produces a durable, flexible, weather resistant finish and exhibits excellent adhesion to wood, steel, concrete, galvanized metal, aluminum and treated or untreated vinyl.

It is recommended for painting backgrounds, lettering copy and graphics on signs, outdoor advertising billboards, metal highway signs, commercial signs and vinyl banners. Dries to touch in 30 minutes; to handle in 2 hours. Re-coat in 8 hours. Will take longer to dry under colder or more humid conditions. Wait 8 hours before rolling or folding vinyl signs, Application Method: brush, roll or spray.

WATER BASED • LEAD FREE  
**AQUA LEAF**  
METALLIC LOOK FINISH

## AQUA-LEAF

Aqua Leaf is a water based, lead free, non-gassing, pearlescent, metallic-like coating with built in ultra violet protection. It is formulated with nacreous pigments to yield a lustrous metallic look. It dries to a flexible, weather resistant, fade resistant, bright metallic like finish and exhibits excellent adhesion to wood, metal, treated and untreated vinyl and many other substrates. Aqua Leaf can be used on any interior or exterior properly primed white substrate.

Used by furniture and cabinet refinishers for a variety of decorative applications. Also used extensively by specialty painters and artists for faux finishes and glazing.

Non-Flammable, non-toxic when cured, low odor. Dries to touch in 45 minutes to 1 hour; to handle in 2 1/2 hours; to re-coat in 6 hours. Full cure takes 12 hours. Will take longer to dry under colder or more humid conditions.

## SIMILAR TO DEKA ENAMELS

We have started to carry the Aqua-Cote and Aqua-Leaf to replace the discontinued Deka line. While the colors are different, the properties of easy clean up and low toxicity make these paints the perfect replacement for all those hobby and faux-finish projects where Deka was recommended.

## AQUA-COTE
