## Cut Vinyl

See pages 23-25 for more!

### 3M SCOTCHCAL 7725

These are pressure-sensitive films designed for permanent graphics that may be cut, screen printed or used in thermal transfer printing systems. 7725 has a transparent synthetic liner that resists moisture absorption and static buildup, lays flat for easier assembly of multicolor graphics, and allows superior cutting and weeding. 2.0 mil, gloss, 8 year outdoor durability, flat, with and without rivets; simple curves.

*Thermal transfer printable. Over 100 colors available.*

### ORACAL® SERIES 751 HIGH PERFORMANCE CAST

2-mil, multi-purpose, premium cast PVC vinyl film. Outdoor durability of 8 years for black and white, 7 years for colors and 5 years for metallic.

### 3M SCOTCHLITE 5100/5100R

Enclosed lens, retroreflective, 7.0-mil engineer grade film offering flexibility and excellent angularity. Use this film for decals, commercial and non-regulated signage, vehicle markings, emblems and striping on vertical, flat or simple curves only with or without rivets. 3M 5100 has 7-year outdoor durability. Available in 15 colors. 5100R has removable adhesive.

Inkjet and Thermal transfer printable.

### NIKKALITE™

### SERIES 48000 FLEXIBLE ENGINEERING GRADE

NIKKALITE Brand Engineering Flexible Grade (ELG) is a flexible, glass beaded lens retroreflective sheeting that renders retroreflectivity at night. Specifically designed for fleet and vehicle graphics for application over rivets

and corrugated surfaces. Applicable for commercial sign and label application as well. Performance life of 7 years. Technical Bulletin and specifications available by request.

# GerberColor™ EDGE Foils

GerberColor™ Cartridges

GERBER EDGE FX Refills in Caddies

## GerberColor™ PROCESS PRO™ COLOR

Process PRO foils offer a rich color range and greater photo-realism with Gerber STC halftone dot pattern. GerberGauge™ marking system is imprinted on each GerberColor cartridge to see at-a-glance how much color you have left. Three year outdoor.

Process Color	EDGE 45m	EDGE FX 45m	EDGE FX 91m
	Process Pro Cyan T77190	T78506	T78502
	Process Pro Magenta T77191	T78507	T78503
	Process Pro Yellow T77192	T78508	T78504
	Process Pro Black T77193	T78509	T78505

## GerberColor™ ABRASION GUARD™ SPF

Abrasion Guard™ is a clear, overprint foil that adds protection against moderate or repeated handling. Now, with SPF, Abrasion Guard also provides extra UV protection for your EDGE graphics—adding 30% longer UV life.

	EDGE 75m	EDGE FX 91m
Abrasion Guard SPF	T77167	T78545

## GerberColor™ TRANSPARENT COLOR

Outdoor durable foil for backlit applications. Also, the unique transparent feature allows the characteristics of the base material to show through, so you can enhance reflectives, metallics, holographix, chromes, and more. Use on opaque film for regular spot color applications too. Three year outdoor.

Transparent Color	EDGE 45m	EDGE FX 15m	EDGE FX 45m

## GerberColor™ SPECIAL EFFECTS SERIES

- Flood Coat is an opaque white foil excellent for “flood coating” the final backing layer of a graphic which has been reverse-printed on clear material.
- Jet Black is intended for use in the production of interior and exterior graphics, POP displays, film positives, or any graphic requiring high density black-outs.
- Use Fluorescent for brilliant interior signs.
- Metal Flake is a clear foil with metal flakes to print on top of any color to produce a metallic effect.

## 3M 180MC CONTROLTAC™ PLUS WITH MICROCOMPLY™ **NEW!**

Conformable, cast film with a pressure activated adhesive, enables you to apply large graphics quickly and easily. The new 180mC contains non-visible air release channels that allows air bubbles to be squeegeed out for flawless, bubble-free application. 2-mil film with 7-year exterior performance. Grey, pigmented, permanent adhesive makes this film opaque.

Finish	Color	Inches	Yards	
Gloss	White	15	10	T77380
Gloss	White	15	50	T77381

## 3M 210 SCOTCHCAL FLUORESCENT

Vibrant, attention-getting graphics with excellent visibility even in low light conditions. 3M formulation is among the most colorfast on the market. 1-year cast vinyl with permanent adhesive.

Color	Inches	Yards	
Pink	15	10	T28000

## GERBER IMAGECAL™ P CLEAR

Clear, 4.5-mil, calendered PVC film with a clear, permanent adhesive.

Finish	Color	Inches	Yards	
Gloss	Clear	15	10	T77360
Gloss	Clear	15	50	T77361

### 30 PRINTABLE COLORS!

## ORACAL® SERIES 8300 TRANSPARENT CAL

3-mil, 5-year transparently dyed, glossy PVC with UV stabilizers. These clear colors can be superimposed to create an infinite color palette. Designed for illuminated signs, backlit acrylic and window graphics or decorations.

### 55 PRINTABLE COLORS!

## ORACAL® SERIES 8500 TRANSLUCENT CAL

3-mil, 7-year high performance calendered PVC film with a satin finish that reduces glare. Designed for illuminated signs, backlit acrylic, glass surfaces and translucent banners.

## GERBER **Improved!** QUANTUM™ II

3.0-mil calendered vinyl designed for optimal print quality with the GERBER Edge. QUANTUM II has a slightly higher gloss level than the original QUANTUM.

Color	Inches	Yards	
White	15	50	T25000
Black	15	50	T25001

## 3M GERBERVISION™ WINDOW FILM

One-way viewable, white PVC vinyl with a removable black adhesive, formulated for Gerber by 3M, for use on store and vehicle windows.

Finish	Color	Inches	Yards	
Gloss	White	15	10	T77356
Gloss	White	15	50	T77357

## 3M GERBERVISION™ II

Same as original GerberVision with an additional paper liner to block holes for use with vacuum hold-down printers.

Finish	Color	Inches	Yards	
Gloss	White	15	10	T77374
Gloss	White	15	50	T77375

## GERBERGLOW™ GLOW-IN-THE DARK

"Glow in the Dark", 2.5-mil, indoor vinyl for novelty use, promotional decals, etc. One hour charge will glow brightest for 30 minutes. For indoor use.

Finish	Inches	Yards	
Gloss	15	10	T77376
Gloss	15	50	T77377

## 3M SCOTCHCAL LUMINOUS™ GLOW-IN-THE DARK

Rechargeable "Glow in the Dark", 9-mil vinyl bright enough to be seen in total darkness. Three minute light charge will last for up to 7 hours. Meets standards and requirements of the International Maritime Organization, National Fire Protection Association and the Federal Railroad Administration.

Inches	Yards	
15	10	T77368

### 3M 280i PLUS SCOTHLITE REFLECTIVE WHITE

Gerber Series 280i Plus is a high performance, white reflective film made for Gerber by 3M. It is optimized for printing on the GERBER EDGE thermal transfer printers and is removable with heat. 280i Plus is a durable, dimensionally stable film with a clear, pressure-sensitive adhesive designed to withstand a variety of severe weather and handling conditions. It is backed with a 78 lb. double-sided, poly-coated liner. This versatile material is perfect for moderate curved surfaces, flat surfaces with or without rivets, flexible signage, glass, metal, acrylic, polycarbonates, fiberglass, and painted surfaces.

NOTE: 280i has been replaced with 280i Plus due to its improved capabilities.

## GERBER SHINY & BRUSHED SILVER LABEL 2-MIL

Gerber EDGE-Ready, 2-mil, metallized, polyester film for interior and exterior use. Shiny Silver and Brushed Aluminum have up to a 2-year exterior performance life.

Color	Inches	Yards	
Shiny Silver	15	10	T77430
Shiny Silver	15	50	T77431
Brushed Silver	15	10	T77338
Brushed Silver	15	50	T77339

## CONVEX CHROME HIGH-BOND 4-MIL

Conformable, 4-mil, Convex film with an ultra-shiny mirror finish. Unlike metallized polyester, Convex Chrome won't tear or oxidize for long-term outdoor durability. For brilliant results, print with GerberColor Transparent Edge foils. A thin, polyester mask film protects the chrome surface and must be removed before printing. Recommended Laminate: Convex Laminate, Pro-Shield and Gerber UV Guard (5-year or 9-year).

## ORACAL CHROME 352 PRINT POLY 1-MIL

ORACAL Series 352 is a 1-mil metallized polyester film with excellent dimensional stability. Optimized for screen and thermal print applications, this printable polyester is designed for weather-resistant decorative labels, name, and technical plates, decorations, moldings, and lettering. 901 Chrome and 912 Gold are 2-mil PETP films. Chrome films have a 2 year outdoor rating; gold-colored film has a one year outdoor durability.

Color	Inches	Yards	
Chrome	15	10	T38401

## ORACAL CHROME 351 POLYESTER 1-MIL

ORACAL Series 351 is a 1-mil metallized polyester film with excellent dimensional stability and good, long-term aging properties. Designed for weather-resistant decorative labels, name, and technical plates, decorations, moldings, and lettering. Chrome and Matte Chrome have a 2 year outdoor rating; gold-colored polyester has a one year outdoor durability.

5-year Durable Films • 3-mil • Metallized PVC • Gloss Finish

## R TAPE® VINYLEFX® SERIES 4000 OUTDOOR DURABLE

Compared to cold-embossed polyesters Vinylefx® films are hot-embossed, which produces deeper, better defined patterns.

Unlike polyesters, R Tape Vinylefx® are just as easy to cut, weed and apply as an intermediate vinyl.

The Vinylefx® films can be computer-cut, steel rule die cut, thermal die cut, embossed and domed.

For demanding applications such as truck and boat graphics, the Vinylefx® Durable Series films provide a superior alternative to the expensive simulated gold-leaf films.

<b>4-mil</b>			
White	15	10	T77228
White	15	50	T77229

## CONVEX® CLEAR FOR LACROSSE AND HOCKEY HELMETS

New CONVEX media specifically formulated for plastic Lacrosse and Hockey helmets and easier to apply, with a more aggressive adhesive for plastic. You can apply it even when it's cold; perfect for work at the ice rink or in early spring weather. This specialty media is an 8-mil clear base media with a clear adhesive to allow the color of the helmet to show through. Formulated for printing on the Gerber EDGE and compatible with all CONVEX and PRO-SHIELD laminates.

Color	Inches	Yards	
Clear	15	5	T77209
Clear	15	10	T77210

<b>5-mil</b>			
White	15	10	T77206
White	15	50	T77207

## MOTOWRAP™ 2

Create extremely durable decals and graphics for power sports vehicles. MotoWrap offers the best mix of adhesion, conformability, and economy. Printable, 4-mil, glossy pliable vinyl with 1.5-mil of aggressive adhesive. MotoWrap is not as aggressive as Convex High-Bond and more translucent, but less expensive and easier for the unskilled user to apply.

Color	Inches	Yards	
<b>4-mil</b>			
White	15	10	T77291
White	15	50	T77293

## CONVEX® REVERSE™ CLEAR AND K-9 ADHESIVE

CONVEX® Reverse™ is a 16-mil, sub-surface print vinyl that is thick and pliable for application to helmets and other sports decals. Because it is soft and moldable, it will conform to curved surfaces. Graphically clear, so the colors underneath are not muted.

CONVEX Reverse film has no adhesive, so you print on it in reverse (wrong reading) and then apply K-9 Adhesive. You can cut it before or after you apply the adhesive depending on how you want to deliver your finished product.

# EDGE MEDIA - Laminate

## MOTOWRAP™ LAMINATE

Create extremely durable 12-mil decals for power sports vehicles using printable 4-mil MotoWrap vinyl media and 8-mil MotoWrap Laminate. The MotoWrap line offers the best mix of adhesion, conformability and economy. MotoWrap Laminate is similar to the original Convex Laminate, and is less expensive. MotoWrap Laminate is more pliable and conformable than ProShield Laminate, but less durable (ProShield is still recommended for high abrasion applications, such as motocross number plates and shrouds).

Color	Inches	Yards	
<b>8-mil</b>			
Clear	13	10	T77294
Clear	13	50	T77295

## STUBBL™ NON-SLIP LAMINATE

18-mil thick, non-slip, "grippy" laminate film with a 2-year outdoor life. Provides extra traction on wet or dry surfaces. Laminate printed graphics for boat decks, surf boards, ATV's, motocross bikes, skate boards, etc. Heavily textured Stubbl exceeds OSHA and ADA Standards for non-slip protection on hazardous surfaces. Certified as "High Traction" by the NFSI.

Finish	Inches	Yards	
<b>18-mil</b>

<b>8-mil</b>			
Clear	15	10	T77264
Clear	15	50	T77265

## MODELMARK™ & RUBBERMARK™ TRANSFER ADHESIVE

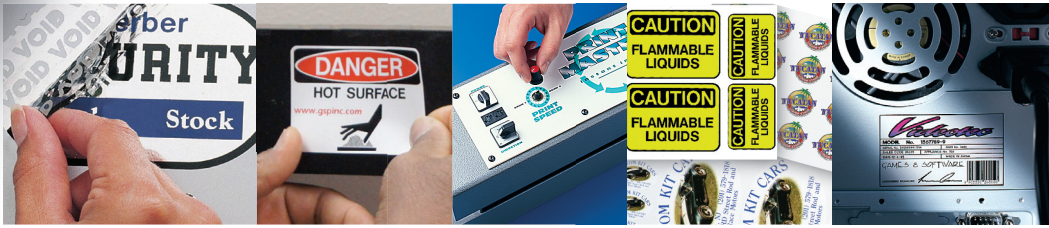

ModelMark is a revolutionary ultra-thin material, that allows you to create graphics that can be transferred to high and low energy surfaces. It is revolutionary because it is 1/3 of a mil thick. When it is printed on and ModelMark adhesive is applied, the full graphic is as thin as 1.5 mils. That is virtually no profile – perfect for clear coat applications where you don't want to feel or see the edge of a decal. RubberMark is another adhesive specially formulated for rubber surfaces such as tires.

## 3M/GERBER SCOTCHCAL™ SERIES 225

EDGE READY  
**24**  
Colors!

Extremely versatile, 2-mil premium cast film with a clear, waterproof release liner. Color-to-color registration is better for printing than vinyl with paper liner.

## 3M/GERBER SCOTCHCAL 230 TRANSLUCENT

EDGE READY  
**51**  
Colors!

Three to five-year high performance, 3-mil cast film designed to create cut graphics on backlit signs, awnings, or windows. 15" format is EDGE-READY™.

## 3M/GERBER SCOTCHCAL 210 DUSTED AND FROSTED CRYSTAL

Dusted Crystal is cut graphic film that gives the appearance of etched glass. Frosted Crystal is cut graphic film that looks like sandblasted glass.

Now Available in 24" & 48" Widths!

## 3M/GERBER SCOTCHCAL 210 5-MIL FLUORESCENT

**5**  
Colors!

Fluorescent films are glossy, opaque EDGE-READY™ films intended to create highly conspicuous graphics under daylight conditions. 1-year exterior performance.

## ORACAL® SERIES 951 HIGH GLOSS PREMIUM PERFORMANCE

**151**  
Colors!

2-mil, multi-purpose, premium cast PVC vinyl film with "extreme" outdoor durability of 12 years for black and white, and 10 years for colors.

## ORACAL® SERIES 751 HIGH PERFORMANCE

**78**  
Colors!

2-mil, multi-purpose, premium cast PVC vinyl film. Outdoor durability of 8 years for black and white, 7 years for colors and 5 years for metallic.

## ORACAL® SERIES 8810 FROSTED GLASS

**5**  
Colors!

ORACAL Series 8810 is a 3 mil, 7 year cast PVC film for high quality sparkled glass (or frosted) decoration.

## ORACAL® SERIES 7510 PREMIUM FLUORESCENT

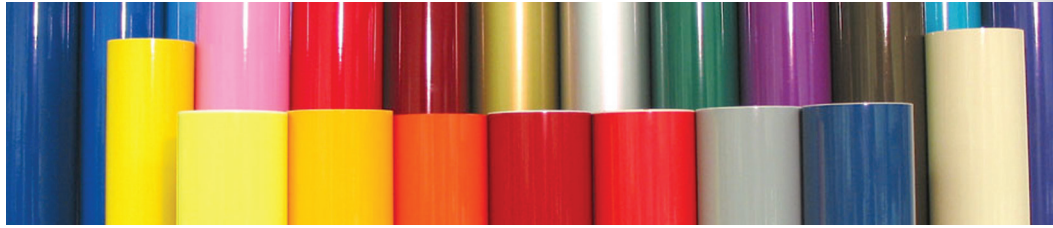

**6**  
Colors!

ORACAL Series 7510 is a 6 mil, 1-to-2 year premium-grade cast fluorescent day-glow film with high visibility in all daylight conditions.

# PLOTTER CUT FILM - Calendered

**ORACAL® SERIES 641 ECONOMY CAL** **21 NEW Matte Colors!**  
 2.75-mil economy-grade PVC film with up to 4-year outdoor durability. Ideal for shorter term, non-vehicle applications. Thermal printable.

**ORACAL® 341 PROMOTION CAL** **21 Colors!**  
 Our most economical opaque marking film, ORACAL 341 is a soft PVC 3-mil, 3-year film with a high-gloss surface. A great choice for banner, yard signs and other shorter-term applications. Available in 21 colors and transparent.

**ORACAL® SERIES 8300 TRANSPARENT CAL** **30 Colors!**  
 3-mil, 5-year transparently dyed, glossy PVC with UV stabilizers. These clear colors can be superimposed to create an infinite color palette. Designed for illuminated signs, backlit acrylic, and window graphics or decorations.

**ORACAL® SERIES 8500 TRANSLUCENT CAL** **55 Colors!**  
 3-mil, 7-year high performance calendered PVC film with a satin finish that reduces glare. Designed for illuminated signs, backlit acrylic, glass surfaces, and translucent banners.

**ORACAL® 631 EXHIBITION CAL** **69 Colors!**  
 This 3-year film removes cleanly and easily for up to 2 years after application and has a matte surface that suppresses unwanted reflection. It's an ideal choice for temporary, short-term, and medium-term indoor graphics--especially in trade shows, displays and exhibitions. Available in 61 colors and transparent.

**FDC 4304 EASY REMOVABLE CAL** **4 Colors!**  
 3.0-mil, 2-year outdoor film with a removable adhesive.

**FDC 4725 INTERMEDIATE VINYL FILM** **34 Colors!**  
 3.2-mil, 6-year outdoor durability available in 34 EDGE printable colors.

**FDC SERIES 4200 INTERMEDIATE ULTRA HIGH GLOSS** **44 Colors!**  
 2.8-mil calendered vinyl film with a 5-year outdoor durability.

**FREE Ground Shipping on \$200+ in the continental U.S.**

## INKJET Static Cling

### FDC® 7262 STATIC CLING PRINTABLE

A calendared static cling vinyl designed for printing window graphics and decals. This product's unique construction provides easy positioning, repositioning and removal. FDC 7262 is 7.5 mil, white/clear, gloss, 3 month outdoor durability.

## INKJET Wall Fabric

### FDC® 7335

FDC 7335 is a 7-mil, premium polyester fabric with a removable adhesive designed for printed wall graphics. Graphic will remove cleanly. Solvent, eco-solvent and UV printable.

## INKJET Magnetic

### MAGNETIC INKJET SHEETING

Flexible, inkjet-printable, matte white magnetic sheeting. UV, solvent and eco-solvent inkjet printable, without any other top coat required. 4-5% stronger magnetic pull strength than most other competitive brands. Back coated on the magnetized side to help reduce blocking and migration. Available in 24.375", 30", and 40" widths.

Thickness	Strength per sq ft
.030-inch	95 lbs pull
.020-inch	63 lbs pull
.015-inch	42 lbs pull

### PRESTOTEX® POLYESTER FABRIC

Presto digital print media uses repositionable peel and stick materials that can be installed in minutes and taken down just as easily. Taking the wallcovering down leaves no trace of adhesive behind and damages no surface type. The microsphere adhesive holds the covering as firmly as traditional, but messy, water and paste methods. Available in PrestoTex Gold Iridescent, and Silver; CanvasTac Gold Iridescent and Silver, and WallFab.

## Application Tapes

ApliTape products come in low, medium and high tack levels with standard weight paper. ApliTape application tapes tear cleanly with no stringy adhesive and hold up longer during wet method applications.

Ingenious tapes that lay flat and stick to the liner. Conform tapes come in a full range of tack levels from medium to extra-high on standard and premium weight papers.

Clear Choice by R Tape, a cost-effective alternative to paper tape for sign makers. Clear Choice makes multi-layer application jobs visible and seamless. User-friendly, no-stretch, exceptionally clear film lays flat and is very forgiving if the adhesive side accidentally folds onto itself.

### MAINTAPE 575 PerfectTear

575 PerfectTear application tape (for vinyl graphics) made with a special high-tack, 'non-stringy' latex adhesive. Excellent for pre-spaced small and medium sized cut vinyl letters, fleet graphics, and decals. All-purpose application tape for most sign shop applications.

### HEYTEX® TEXTILES

HEYtex Technical Textiles available in 100% PVC-free woven polyester with an acrylic coating for interior use, and PVC-coated textiles for interior/exterior use. Choose from Frontlit, Backlit, Canvas, and Blockout. HEYtex weaves fabrics and applies its own ink receptive coatings. FDC stocks textiles that can be printed with latex, solvent, eco-solvent, UV curing and dye sublimation inks. Textiles are used for a variety of applications like interior banners, backlit framed signage, trade exhibits and display graphics.

# Selection of EDGE Materials and ACTIVE & INKJET PRODUCTS

visit [www.hyatts.com](http://www.hyatts.com)

## INKJET Convex®

### CONVEX® GEARWRAP IJ

Like the name suggests, this inkjet printable film will make decals for helmets and other gear. The vinyl is 4-mil thick and very conformable. Special adhesive will stick to high energy surfaces but it will remove without adhesive residue for up to one year. Pair this film with CONVEX 4-mil or 8-mil laminate.

### CONVEX® HIGH BOND

Ideal for high-quality durable markings or decals on motocross bikes, ATV's, cars, gasoline pumps, vending machines, ATMs, outdoor power equipment, and other interior and exterior markings. Convex High-Bond vinyl for solvent-based inkjet printers is 6 mil thick. All Convex and Pro-Shield laminates are compatible.

### CONVEX® ProShield LAMINATE

Pro-Shield is the solution for plastics on MX bikes that receive a tremendous amount of abrasion from boots and knee braces. Many professional shops choose to use the combination of Convex High-Bond with Pro-Shield for the whole bike because they can mold the Pro-Shield to almost any shape with the aid of a heat gun. Pro-Shield comes in 7 and 12 mil. When you print with 6 mil HB Convex, and use Pro-Shield 12 mil, your result is a 19.5 mil thick decal, with the adhesive. This provides an extremely durable barrier for your graphics.

## INKJET Banner

### FDC™ 7504 PVC BANNER • 13oz

13oz High Strength General Purpose FDC 7501 Banner. Durable, high-strength 13oz. PVC banner for general purpose signage. Designed to accept solvent and eco-solvent inkjet and vinyl lettering for general purpose indoor and outdoor applications. 1-year outdoor durability. Bright white; one side is smooth for printing. Tear, curl and fire resistant, passing the NFPA 701 fire resistant certification test. 40 yard rolls in both Gloss White and Matte White.

### FDC™ 7505 SUPER SMOOTH BLOCKOUT 13oz

13oz General Purpose & Display FDC 7505 Blockout Banner. Premium quality, matte white, super smooth, two-side printable, 13oz. blockout banner with a matte finish. Designed to accept solvent and eco-solvent for general purpose indoor and outdoor applications. 1-year outdoor durability. Tear, curl and fire resistant, passing the NFPA 701 fire resistant certification test.

### FDC SERIES 7604 NON-CURLING

A scrimless, non-curling 13 oz. PVC banner designed for printing pop-up or roll-up displays. It is a super smooth one side printable non-top coated media with a grey polyester back that provides opacity and obstructs light. 15 oz, luster finish.

## High Performance

### ORAJET® 3951RA PROFESSIONAL CAST with *RapidAir*™

10-year Film for Vehicles and Exterior Signage

Gloss white cast film with RapidAir® technology. The 2-mil, 10-year vinyl for solvent-based printing is highly conformable over almost any surface and when matched with ORAGUARD 290 creates the best end product Oracal has to offer.

- 10-year, repositionable professional material with RapidAir® adhesive.

### ORAJET® 3751RA CAST with *RapidAir*™

8-year Film for Vehicles and Exterior Signage

ORAJET 3751RA Cast Film with RapidAir Technology features a repositionable, grey adhesive with a lower initial tack. 2.25-mil, 8-year, glossy, white, cast film for solvent-based inkjet printers, with a price comparable to calendered films. Graphics can be removed, with little to no adhesive residue, for up to four years. Highly conformable performance over difficult curves, corrugations and rivets. Match with ORAGUARD 290 Laminate Film.

- 2.25-mil
- Solvent-based, grey adhesive with air-egress technology
- Features a *lower initial tack!*
- Removable with little to no adhesive residue for up to 4 years
- 8-year cast film with a price comparable to calendered film

## Inkjet Media for Specialty Use

### ORAJET® 3105HT HIGH TACK CAL

High tack, 4-mil, calendered PVC, gloss white film for solvent-based inkjet printers. Five-year outdoor durability (unprinted). An ideal choice for "hard-to-stick" rough or textured, low-energy substrates. Permanent grey adhesive.

Recommended Laminate: ORAGUARD 215 and 290

### ORAJET® 3551 HIGH PERFORMANCE ULTRA-CAL

7-year Film for Vehicles and Exterior Signage

2.75-mil high performance, opaque PVC film with a repositionable, permanent adhesive. Ideal for medium to long term signage and vehicle graphics.

Recommended Laminate: ORAGUARD 215 and 290.

### ORAJET® 3551RA HIGH PERFORMANCE ULTRA-CAL with *RapidAir*™

The exact same material as the 3551, but it has the RapidAir® adhesive. The RapidAir (RA) air release channels prevent air bubbles during application.

- 7-year High Performance Ultra-Calendered Inkjet media.
- RapidAir® Repositionable Gray adhesive for perfect application.

Recommended Laminate: ORAGUARD 290 .

### ORAJET® 3109 REMOVABLE TRANSIT GRAPHICS

The ORAJET 3109 is a 2-year removable transit graphics media available in special widths to accommodate popular advertising formats. It is a 4-mil, white gloss PVC film that has grey pigmented solvent adhesive to block out backgrounds and make the printing really pop.

## Intermediate

### ORAJET® 3651RA INTERMEDIATE CAL with *RapidAir*™ 7-year Permanent PVC

Intermediate calendared PVC digital media with RapidAir technology. 2.5-mil, 5-year, gloss white film with air-release, permanent grey adhesive. Suitable for solvent-based digital printing for general signage.

Recommended Laminate: ORAGUARD 210, 215.

### ORAJET® 3651 INTERMEDIATE CAL 5-year Permanent PVC

Versatile, 2.5-mil intermediate-grade PVC film with a permanent adhesive. Perfect for a broad range of indoor and outdoor applications—vehicle graphics, general outdoor signage, promotional displays, and banners.

Recommended Laminate: ORAGUARD 215 and 210.

### ORAJET® 3165RA INTERMEDIATE CALENDERED with *RapidAir*™ 5-year PVC for Flat Surfaces

ORAJET 3165RA Calendared Inkjet Media is an economical 3.75 mil, 5-year film with a grey, solvent based adhesive making it ideal for a wide range of intermediate-term signage and graphics for a flat surface application.

Recommended Laminate: ORAGUARD 210 or 215.

## Economy

### ORAJET® 3640 SOFT CALENDERED

#### 4-year Economy PVC

3-mil, 4-year unprinted outdoor, economy-grade PVC film with a permanent, clear, water-based adhesive. Best suited for printing brilliant and colorful displays for short-term and medium-term applications.

Recommended Laminate: ORAGUARD 200 and 210.

### ORAJET® 3164 SOFT CALENDERED

#### 4-year Economy PVC

3.75-mil, 4-year unprinted outdoor, economy-grade PVC film with a permanent, clear, water-based adhesive. Short-term and medium-term applications, such as POP, exhibits, outdoor signs and banners.

Recommended Laminate: ORAGUARD 200 and 210.

## Laminate

### ORAGUARD 290 Premium Cast Laminate

Highly flexible laminating film that is suitable for almost any outdoor or indoor application. Recommended for fleet and large graphics. 2-mil, high performance cast film with a UV extension factor of 4 years. Permanent, solvent-based adhesive.

### ORAGUARD 215 Intermediate Laminate

Versatile PVC film designed to protect digital prints in medium-term to long-term applications. 2.75-mil calendared PVC with permanent, solvent-based adhesive and a UV extension factor of 3 years.

### ORAGUARD 210 Intermediate Laminate

Designed to protect large format digital graphics in medium-term indoor and outdoor applications. 2.5-mil, calendared PVC with a UV extension factor of 2 years. Permanent, solvent-based adhesive.

### ORAGUARD 200 Economy Laminate

Economic PVC constructed for inexpensive protection of large format digital prints in indoor applications. 2.5-mil, calendared PVC with a UV extension factor of 1 year. Permanent, water-based adhesive.
